

LET'S TALK ABOUT WEST PAPUA

Join us to hear from two remarkable West Papuan human rights defenders leading a campaign for dignity and safety.

Our neighbours in West Papua face horrific human rights violations at the hands of Indonesian security forces. Shockingly, the Australian Government continues to provide support – with weapons, intelligence sharing, training and logistical support – of the violent suppression of Papuan voices.

This is a unique opportunity to hear first-hand accounts of the violence being inflicted on the Papuan people and to learn about what we can do to stand with them and ensure our own government stops condoning torture and political assassination.
